QSIP NEWSLETTER NO 7 2025

Dear quantum innovation friends,

I hope this newsletter finds you well!

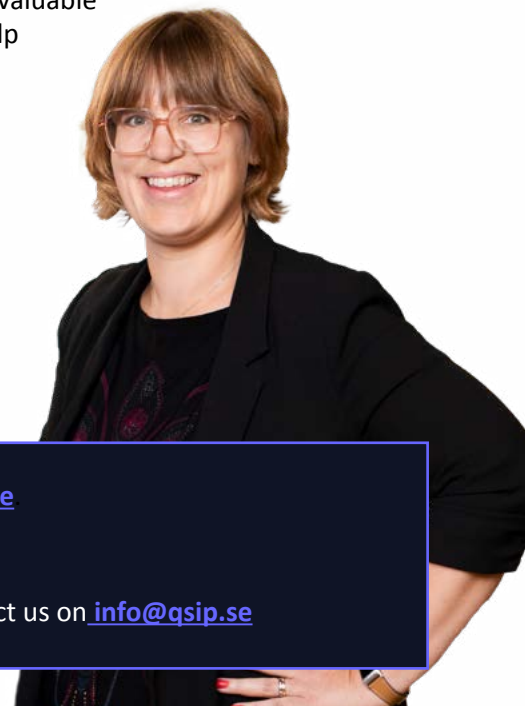

Believe it or not, Christmas is just around the corner, and soon we'll be welcoming a new year. This also means QSIP is turning two years old, and what a journey it has been! The community has grown, and we're grateful that so many of you continue to engage with our activities and events.

Since our last newsletter, a lot has happened: a Memorandum of Understanding was signed for collaboration in Quantum Technology between Sweden and Singapore, we organized Swedish delegations to both the Swiss Quantum Week and the UK National Quantum Technologies Showcase, and QSIP was well represented at EQTC in Copenhagen. You can read more about all of this below.

It's also worth mentioning that several pre-studies related to Quantum Technology for the Excellence Cluster initiative, funded by Vinnova and VR, kicked off in November. Multiple workshops will be held where participants outside these project consortia can join and help shape the future clusters. If you're interested in this work but unsure who to contact, feel free to [reach out to us](#), we'll guide you in the right direction. We'll also do our best to list upcoming workshops in our calendar.

Lastly, don't forget our [Partnership Forum](#)! This partnership offers a valuable opportunity for stakeholders in Sweden's quantum community to help shape our work, and the partnership fees will be crucial if we aim to expand QSIP's activities.

*With kindest regards,
Camilla Johansson,
Director QSIP*

News and updates from QSIP

MoU between Singapore and Sweden within Quantum

Singapore's National Quantum Office and 11 Swedish universities and research institutes have committed to promoting collaboration in the field of quantum technology. On Oct 31st, the Swedish Deputy Prime Minister, and Minister for Energy, Business and Industry, Ebba Busch, and Jasmin Lau, Minister of State, Ministry of Digital Development and Information & Ministry of Education, attended the ceremony in Singapore to witness the signing. The MoU was, during the ceremony, signed by Mr. Ling Keok Tong, Executive Director of the National Quantum Office (NQO), representing Singapore's quantum ecosystem, and Dr. Camilla Johansson, Director of the Quantum Sweden Innovation Platform (QSIP), representing the eleven Swedish research institutions.

For further information, please visit our [website](#).

Swedish delegations to Swiss Quantum Week and UK National Quantum Technologies Showcase

In October and November, QSIP organized trips to the Swiss Quantum Week and the UK National Quantum Technologies Showcase. For both events, QSIP facilitated travel grants from Vinnova to support Swedish SMEs and start-ups.

QSIP's Vice Director, [Jon Wingborg](#), participated in both trips and is continuously seeking new opportunities to connect Swedish actors with the broader international quantum community. Please reach out to him if you are interested to join future delegation and/or know about an event we shouldn't miss.

European Quantum Technologies Conference (EQTC)

As part of Denmark's EU Council presidency, EQTC 2025 was held in Copenhagen from November 10–13. With a focus on science, policy, and business, the conference brought together representatives from across Europe and beyond. This annual event was originally launched by the European Quantum Flagship.

A strong focus was on Europe's role in the global quantum race. The discussions circled about how fragmented the field is in Europe and that we need to collaborate even more to become a leader (and self-sufficient) in this area. The atmosphere was marked by both pride and concern: Europe has strong research and public funding but is falling behind in commercialization and venture capital. For example, it was mentioned that Europe has the most start-ups in the quantum field, but there is no scalability due to lack of funding.

The conference also reflected the paradox we have encountered many times before: the desire to remain

open and collaborative while at the same time needing to protect critical technology. The European strategy published this summer and the upcoming Quantum Act were, of course, mentioned in several presentations, which also addressed how these should or ought to be implemented.

Conclusion: Europe has a chance to lead but must act quickly and in unity!

During the conference, QSIP's director Camilla Johansson participated in a panel discussion, focusing on the importance of ecosystems and the role of international collaboration at the ecosystem level. The discussion highlighted how interconnected ecosystems foster innovation and accelerate progress across borders. Building strong collaborative frameworks is essential for sustainable growth and global impact in quantum technologies. Fellow panalists: Kristine Helen Falgren (Danish Quantum Community), Freeke Heijman-te Paske (European Quantum Industry Consortium (QuIC)), Vita Markeviciute (the Research council Lithuania) and Jonathan Legh-Smith MBE (UKQuantum)

QSIP's Innovation Competition: Reportages about the winning projects

We have started publishing articles about the winning projects from our Innovation Competition. If you're interested in learning more, please visit our [website](#).

QSIP activities and events – Upcoming

December 3 (10:00-15:00)

Workshop: AI and Quantum for Engineering Asset Management, arranged by Luleå Technical University and QSIP. More information and opportunity to register to the WS will come later.

External events – Upcoming

Here we list external (non-QSIP organized) conferences and events which we see as interesting for the Swedish Community. However, the list is not complete. **Please, let us know of any national or international events that you are participating in and/or see interesting for the Swedish Quantum community.** We are continuously adding new items to the list as well as looking at opportunities to bring Swedish actors to these occasions.

[Q-EXPO](#), Bilbao, Spain, May 18-20, 2026.

[Quantum Meets, Amsterdam](#), Netherlands, May 19-21, 2026

[IQT Nordics 2026](#), Oslo, Norway, June 22-24, 2026

QSIP is a part of the program committee also for next year's conference. We are right now looking into different possibilities to represent QSIP and the Swedish eco-system at the conference. If you are interested to join us there and what possibilities there are, please reach out to [us](#).

Calls for funding

Please visit [our website](#) for an updated list between the newsletters.

Vinnova

Digital infrastructure and communication through advanced digitalization 2026.

Deadline 13 January.

[Read and apply more here.](#)

Horizon Europe

Quantum Grand Challenge.

Deadline 8 January.

[Read and apply more here.](#)

Open Call for Solutions, Missions, Trainings and Services.

Deadline 19 January.

[Read and apply more here.](#)

Nordic Innovation

Green and Competitive Nordic Region.

Deadline 11 February.

[Read more and apply here.](#)
